Early = Dec ripening, Mid season = Jan/Feb and Late season = March into April**

CLUTHA Summer fruiting, (Dec/Jan) medium sized red shiny fruit easily removed.
Good yields. Suitable for Central and Southern districts.

LEWIS A mid season summer fruiting variety with very good yields. The fruit is
medium to large, medium red very firm and shiny. The fruit is easy to pick is a double
cropper and also suited to a warmer climate.

WAIAU A variety suited to parts of NZ from Waikato South. Very large fruit, firm
medium red fruit with a good flavour. Will fruit in summer on first year canes (Primocanes)
and an autumn fruit on second year canes (Floricanes)

CURRANTS

GLORIA de VERSAILLES - RED Excellent crops of red berries, which are great for small
gardens providing fruit for jams, jellies, pies and tarts. Fruit ripen Dec/Jan. Cut whole
clusters to avoid damage.

MAGNUS – BLACK Moderately, vigorous, hardy upright bush, big fat even sized
berries ripening mid Dec/Jan. Yields up to 4kg per season. Black currants are notably high
in Vitamin C, and can be selectively harvested taking the first ripe fruit and then allowing
the whole truss to mature, picking the fruit over a period of time.

ELDERBERRY

LACINIATA – Fern or Cut leaf Elder A delicate fernlike foliage makes this a very
attractive plant in the garden with the added benefit of lovely flower heads in spring and
berries in the autumn. Elders are favoured for medicinal properties.

MAGNOLIA were \$38.00 NOW \$30.00
