BERRY BERRY DELICIOUS!

*Our summer catalogue devoted to small fruits, citrus
and berries to tempt your palette.*

BRAMBLES *All brambles are listed below at @ \$14.00 each or buy 3 or more mixed brambles for @ \$12.00 each.*

BLACKBERRY

THORNLESS A thornless variety not inclined to take over the garden. Long fruiting laterals which produce good crops of luscious blackberries, medium in size and jet black when fully ripe. Harvest February through to March.

BOYSENBERRY - Habit 1.5 m high and spreads. They fruit on 2 year old canes.

BAY SURPRISE A very productive variety with medium sized fruit ready Jan-February.

MAPUA A wonderful boysenberry to grow as it is almost thorn less and the fruit have an outstanding flavour. Ripening after the other boysenberry from January to February.

THORNLESS A true thornless variety with large very dark fruit which are very juicy, ripens in January.

RASPBERRY

Generally only leave 4-5 canes to produce fruit per plant.

Early = December ripening, Mid season = January/February and Late season = March into April

BLACK An old fashioned variety with very dark almost black fruit, delicious. Mid season ripening. A true Heritage variety. **(Limited Numbers)**

CLUTHA Summer fruiting, (Dec/Jan) medium sized red shiny fruit easily removed. Good yields. Suitable for Central and Southern districts.

HERITAGE A lovely variety for the home gardener to grow as it is an autumn or late season cropping variety. It fruits in March onwards. Lovely dark red fruit. Easy care as when it is finished fruiting just cut those canes that have fruited back down to ground level.

TULAMEIN A mid season variety which carries on fruiting for a long time. It has good yields and moderate upright cane growth. The fruit are attractive bright red, large to very large in size, show good firmness. Fruit flavour and shelf life are excellent.

SOUTHLAND A variety which is grown commercially, considered to be the sweetest and tastiest of all raspberries. It is a strong grower and produces heavy crops of large, firm, roundish fruit which fruits in late December. Does best in cooler districts.

WAI AU A variety suited to parts of NZ from Waikato South. It is a vigorous variety with spiny strong semi-upright canes. Very large fruit, firm medium red fruit with a good flavour. Will fruit in summer on first year canes (Primocanes) and an autumn fruit on second year canes (Floricanes) **Limited Numbers**

BOYSENBERRY (Larger grade and not included in above special) **\$18.00**

BRULEE A vigorous and semi thornless variety. Produces heavy yields late in the season, large purple/black berries of excellent flavour.

THORNLESS JEWEL A strong growing boysenberry cross, heavy crops of mouth watering large almost blackberries with that traditional boysenberry flavour in late December.

ELDERBERRY ***Spring special 3 for \$30.00***

ELDERBERRY 'ADAM' A fast growing, early producers of large bunches of red/black berries, they require high moisture and prefer a fertile soil. Flowers are great for making elderflower lemonade or Champagne. The berries are good to eat and make excellent cordial or wine as well as having medicinal properties. Grows 2-3 metres. **\$15.00**

LACINIATA – *Fern or Cut leaf Elder*

A delicate fernlike foliage makes this a very attractive plant in the garden with the added benefit of lovely flower heads in spring and berries in the autumn. **\$15.00**

GOOSEBERRY

INVICTA This variety has the RHS award of Garden Merit. The large berries are veined, semi-transparent green tending to yellow when ripe. Fruit ripen in Dec. Expected yields of these large flavourful fruit at maturity are up to 4kg per bush. The fruit can be used for culinary purposes but good eaten fresh when ripe. Resistant to powdery mildew. **\$18.00**

PAX A more upright variety than Invicta & almost thorn less when matures, heavy crops of red berries, showing good disease resistance. Excellent when eaten fresh. **\$18.00**

MYRTLEBERRY – *Myrtus Ugni* ***Also known as Cranberry and Chilean Guava***

A neat creeping, evergreen shrub with small leathery leaves that often turns red. The fruit are scarlet red, round in shape and are similar to Cranberries. Fruit taste is sharp but pleasant and they contain a significant proportion of vitamin C. The uses for the cranberry type berry are great and they are a very versatile fruit being used in pies, jelly, and eaten raw. Easy to prune after fruiting, as they have a natural compact growth, **\$15.00**

SUB TROPICAL

GUAVA

YELLOW Aromatic, sub-acid berries of the guava contain numerous small, hard edible seeds. The fruit are 2-3 cm in diameter with a mild flavour. They can be eaten fresh but also make excellent jams, jellies, pies and drinks. **\$16.00**

RED Strawberry Guava are aromatic, sub-acid berries which contain numerous small hard edible seeds. The fruit has dark red outer skin. They can be eaten fresh but also make excellent jams, jellies, pies and drinks. **\$16.00**

PASSIONFRUIT

BLACK - *Passiflora edulis* A large black eating passion fruit, which contains a sweet fragrant pulp that surrounds numerous black seeds. The vines bear fruit after about 15 months and ripen Feb/march. Passion fruit grow best in a sunny frost-free site protected from cold wind. They need a support such as a trellis. Good drainage is required to avoid root diseases and do best in a loamy soil that has organic matter added. **\$12.00**

POMEGRANATE 'Wonderful'

A multi-stemmed small shrub, double red flowers throughout spring and summer. Medium sized fruit, round with a red leathery appearance. The flesh is red with a jelly like coating that covers many seeds and has a rich flavour that is used for fresh fruit or juice. Hot dry summers are required for good fruiting, but does set more fruit after a cold winter. **\$16.00**

TAMARILLO

RED Tamarillo's are subtropical, they need a frost-free, sheltered microclimate. Best eaten raw but great stewed, bottled and frozen or made into chutney and jam. Oval red skinned fruit produced, with red flesh. **\$12.00**

CITRUS

All citrus \$30.00

GRAPEFRUIT

CUTLERS RED Large fruit with a distinctive flavour, ideal for breakfast, drinks or preserves. Deep orange coloured rind. Large amount of fruit produced in December.

STAR RUBY The fruit are large, juicy yellow skinned, with red flesh. They have a strong pleasant flavour. Large crops of fruit produced in August. Moderately frost tender.

LEMON

LEMON - MEYER A very popular lemon for the home garden. More cold tolerant than other varieties. The lemons are medium in size, thin skinned, frost tolerant and have sweetly fragrant flowers.

ORANGE - *Citrus sinensis*

ORANGE – NAVELINA Large oval-shaped fruit are juicy with excellent flavour, produced in July-August. Frost tender so needs a warm sunny sheltered site. Mature height 3 metres.

FEIJOAS

All Feijoas \$18.00 each

APOLLO - Large, long sweet-tasting fruit with excellent flavour. Skin is light green in colour. Moderately upright growing habit, vigorous, forms a good branching framework. A self-fertile variety with fruit ripening in April, but does best with cross-pollination.

MAMMOTH - A very large fruited old fashioned variety, with smooth green skin, sweet aromatic flavour, slightly gritty, soft juicy pulp. It bears prolifically in May and June and is self fertile.

TRIUMPH - A late season variety which sores well. Medium sized fruit with a firm skin and good flavour, juicy and moderately soft flesh. Best with other feijoas to pollinate.

UNIQUE - Large, sweet, juicy fruit produced on small tree, which bears prolifically. An excellent home garden choice as smaller and self-fertile. Fruit matures in April/May.

FIGS

All Figs \$20.00

ADRIATIC Late, large round green skinned figs with dark red very sweet pulp. Huge reliable crops of good for dessert, jam, wine and bottling. Ripens in April.

BRUNSWICK A long brown skinned fig with good flavour, amber flesh. Breba crop in January and second crop in March.

FRENCH SUGAR A red-fleshed fig of medium size, green red skin and a sweet flavour. It has a long fruiting season and phenomenal cropper in warm districts.

MRS WILLIAM'S A sweet fig with dark amber skin and amber to red flesh. Breba crop is in December and the second crop in late February to March.

GRAPES

All Grapes \$20.00

ALBANY SURPRISE

Good crops of large mild Lubrusca flavoured juicy black Berries. A hardy variety that ripens mid to late season.

BISHOP POMPALIER

A grape from Bishop Pompallier's own plantings in Northland. A disease-resistant large, black, sweet, delicately-flavoured grape. Ripens Early March.

BLACK DALMATIAN Originally from an old Dalmatian orchard in Kohukohu, where they show natural disease resistance. Large black dessert grapes, strong musky flavour and lots of tannin, ripens in late March.

CANADICE

Moderate to heavy crops of medium red fleshy thin-skinned berries in medium shouldered bunches. A mid season variety, disease resistant. Virtually seedless.

NEW YORK MUSCAT Good crops of medium red/black grapes held in loose bunches. They have a pleasant Muscat flavour with a 'Jelly' texture. A Muscat flavour is one with pronounced pungent, sweet floral aromas.

NIAGARA

A very early white dessert grape, ripening March, which is very sweet with a good mild flavour. One of the few dessert grapes that can be grown organically.

SCHUYLER A regular cropping outdoor, table grape, bears from first season. Medium to large berries, jet-black with heavy bloom. Flavour neutral, pleasant. Early Ripening.

URBANA Good crops of large cherry red berries. Fruit is thick skinned with a jelly texture and exquisite sweet Lubrusca flavour. Disease resistant.

GRAPE -WINE

PINOT MENUIER A very early hardy red wine grape, which may be relied upon in all seasons. Attractive woolly white fur on the leaf, appears to make it more frost tolerant.

EDIBLE GARDEN – Orchard extra's

BAY TREE 'Pride of Provence' A lovely evergreen Bay Tree with lush green foliage not as rampant as some varieties, topiaries well. **\$16.00**

COMFREY PLANTS – Comfrey is a fantastic plant for the orchard as living mulch. It has a very long tap root that mines vital minerals from the soil and recycles them to the top for your fruit trees. In winter it dies down and leaves its nutrient rich leaves on the soil surface. Plant at the drip line **\$ 8.00**

GERANIUM - PEPPERMINT A spreading geranium with downy leaves. A strong peppermint scent which is ideal for deterring codlin moth larvae from beneath apple trees. Single white flower. **\$10.00**

MEXICAN MARIGOLD

A bushy evergreen shrub. A strong fragrance from the finely divided foliage is released when rubbed or brushed against. Orange-yellow flowers in autumn-winter-spring with off bloom in other seasons. Plant in sun or part shade in a well-drained soil. **\$10.00**

ROSEMARY

All \$15.00 each or 3 for \$30.00

'LOCKWOOD de FOREST' A low growing (50cm) evergreen rosemary with masses of blue flowers amongst fine green foliage. Suitable for rockeries and trailing over walls etc.

'MOZART' An evergreen rosemary with aromatic foliage very dark blue flowers from late winter to early summer, amazing bee fodder. 1 x 1.5 metres

'TUSCAN BLUE' Is an especially good, upright growing rosemary, with pretty, sky-blue blue flowers over a long period, trims well.

We also have available a lovely range of cape gooseberry, Lipstick Strawberry (delightful cerise pink flowers), Alpine strawberry (white & Red) Thymes, Parsley, Lemon Balm, Pineapple Sage, Mints, Tansy, etc all at @ \$4.00
