BERRY BERRY DELICIOUS!

Our summer catalogue devoted to small fruits, citrus berries and selected fruit trees to tempt your palette.

BRAMBLES *All brambles are listed below*

BLACKBERRY @15.00

BLACK SATIN A large tasty blackberry with black fruit in mid summer on thornless canes. Eat the fruit fresh or lovely to freeze and cook with. Prefer slightly acidic soils, in semi-shaded position and need a trellis or fence for support.

THORNLESS A thornless variety not inclined to take over the garden. Long fruiting laterals which produce good crops of luscious blackberries, medium in size and jet black when fully ripe. Harvest February through to March.

BOYSENBERRY - Habit 1.5 m high. They fruit on 2 year old canes.

BERRY DELIGHT A thornless delicious Boysenberry/Loganberry Cross. The fruit are ready late December in to Jan. Large, dark, rich red fruit, eat fresh or ideal for jam. **\$18.00**

MAPUA A wonderful boysenberry to grow as it is almost thorn less and the fruit have an outstanding flavour. Ripening after the other boysenberry from Jan to Feb @ **\$14.00**

THORNLESS JEWEL A strong growing boysenberry cross, heavy crops of mouth watering large almost blackberries with that traditional boysenberry flavour in late Dec \$18.00

LOGANBERRY @ \$15.00

WAIMATE A thornless bramble which is a cross between a blackberry and a raspberry, with large wine-red berries with a delicious sweet smooth flavour. High in Vitamin C for strong immunity and also high in Vitamin E for strong antioxidant properties.

RASPBERRY @ \$14.00 Or any 3 varieties for @\$12.00

Generally only leave 4-5 canes to produce fruit per plant.

Early = December, Mid season = Jan/Feb and Late season = March into April

CLUTHA Summer fruiting, (Dec/Jan) medium sized red shiny fruit easily removed. Good yields. Suitable for Central and Southern districts.

FAIRVIEW An early to mid season variety (December through January). The fruit are large, light red well flavoured berries. Bears heavy crops. Suited to the Wairarapa and Taupo North.

KAITUNA A good Summer fruiting raspberry, mid to late season. Strong canes of a medium length, with strong attachment. Excellent flavour medium red and high yields.

QUALICUM An early to mid season variety (December) it is a heavy cropper of large, firm medium red fruit with excellent flavour, good shelf life. Shows resistance to Botrytis.

SOUTHLAND A variety which is grown commercially, considered to be the sweetest and tastiest of all raspberries. It is a strong grower and produces heavy crops of large, firm, roundish fruit which fruits in late December. Does best in cooler districts.

WAIMEA A mid season summer fruiting variety, with long sturdy canes and no spines. Waimea needs very little winter chilling and a very hardy raspberry. A good all round raspberry which is light red in colour and of medium sized fruit.

TAYBERRY This Bramble is a cross between a Blackberry and a Raspberry and originates from Scotland. It's berries are delicious sweet and aromatic large fruit which are best eaten fresh. The fruit are easy to pick and best done when the berry colour is a deep maroon. Plant in sun/semi-shade in a deep acidic soil. **\$14.00**

BLUEBERRY Blueberries need an acidic soil pH of about 4.5 and no higher than 5.2, Use flowers of sulphur to lower the pH, adding acid peat, or mulching with pine needles will also lower the PH. Plant at least 2 varieties for pollination.
All Blueberries @ \$18.00

CENTURION A rabbit eye type. Ripens mid Feb. to early April so considered a late season variety. An excellent cropper, producing large clusters of medium sized fruit (12-14mm). Crisp aromatic and spicy flavour.

POWDER BLUE Pink tinged, cream white flowers in spring, followed by large sized firm light blue fruit. High yielding. Bronze autumn toning of the leaves add to versatility of this plant. Suitable for all districts.

TIFBLUE A Rabbit eye variety – and one of the most outstanding blueberry's ever grown. The fruit are large, light blue and ripen late in the season. It is vigorous and very productive and hardier than many Rabbit eye types.

Rabbit eye types Flower in early spring so need to be protected from frosts. But they are much more tolerant of drought, heat and less than ideal soil conditions. (Centurion, Maru, Powder Blue, Rahi, Southland, Tifblue) Cross pollination required

CURRANTS *Spring special on currants 3 for \$40.00*

GLORIA de VERSAILLES - RED Excellent crops of red berries, which are great for small gardens providing fruit for jams, jellies, pies and tarts. Fruit ripen Dec/Jan. Cut whole clusters to avoid damage. **\$15.00**

MAGNUS – BLACK Moderately, vigorous, hardy upright bush, big fat even sized berries ripening mid Dec/Jan. Yields up to 4kg per season. Black currants are notably high in Vitamin C, and can be selectively harvested taking the first ripe fruit and then allowing the whole truss to mature, picking the fruit over a period of time. **\$15.00**

ELDERBERRY *Spring special 3 for \$40.00*

ELDERBERRY 'ADAM' A fast growing, early producers of large bunches of red/black berries, they require high moisture and prefer a fertile soil. Flowers are great for making elderflower lemonade or Champagne. The berries are good to eat and make excellent cordial or wine as well as having medicinal properties. Grows 2-3 metres. **\$15.00**

LACINIATA – Fern or Cut leaf Elder

A delicate fernlike foliage makes this a very attractive plant in the garden with the added benefit of lovely flower heads in spring and berries in the autumn. **\$15.00**

PURPUREA

A dark purple leaved foliage elderberry, prefers some shade to get the most intense leaf colour. Flowers are a stunning soft pink, will tinge the lemonade or Champagne a light pink colour. **\$15.00**

GOOSEBERRY

FARMERS GLORY Considered the best flavoured Gooseberry for cool climates, the green fruit is brushed with streaks of claret when ripe. Unripe fruit can be used for pies and jams or ripe fruit eaten fresh. Very prolific. Sunny and open position ideal 90x90 cm **\$18.00**

INVICTA This variety has the RHS award of Garden Merit. The large berries are veined, semi-transparent green tending to yellow when ripe. Fruit ripen in Dec. Expected yields of these large flavourful fruit at maturity are up to 4kg per bush. The fruit can be used for culinary purposes but good eaten fresh when ripe. Resistant to powdery mildew. **\$18.00**

MYRTLEBERRY – *Myrtus Ugni* Also known as Cranberry and Chilean Guava

A neat creeping, evergreen shrub with small leathery leaves that often turns red. The fruit are scarlet red, round in shape and are similar to Cranberries. Fruit taste is sharp but pleasant and they contain a significant proportion of vitamin C. The uses for the cranberry type berry are great and they are a very versatile fruit being used in pies, jelly, and eaten raw. Easy to prune after fruiting, as they have a natural compact growth, **\$15.00**

SUB TROPICAL

GUAVA

YELLOW Aromatic, sub-acid berries of the guava contain numerous small, hard edible seeds. The fruit are 2-3 cm in diameter with a mild flavour. They can be eaten fresh but also make excellent jams, jellies, pies and drinks. **\$16.00**

RED Strawberry Guava are aromatic, sub-acid berries which contain numerous small hard edible seeds. The fruit has dark red outer skin. They can be eaten fresh but also make excellent jams, jellies, pies and drinks. **\$16.00**

PASSIONFRUIT

BLACK - *Passiflora edulis* A large black eating passion fruit, which contains a sweet fragrant pulp that surrounds numerous black seeds. The vines bear fruit after about 15 months and ripen Feb/march. Passion fruit grow best in a sunny frost-free site protected from cold wind. They need a support such as a trellis. Good drainage is required to avoid root diseases and do best in a loamy soil that has organic matter added. **\$12.00**

POMEGRANATE ‘Wonderful’

A multi-stemmed small shrub, double red flowers throughout spring and summer. Medium sized fruit, round with a red leathery appearance. The flesh is red with a jelly like coating that covers many seeds and has a rich flavour that is used for fresh fruit or juice. Hot dry summers are required for good fruiting, but does set more fruit after a cold winter. **\$16.00**

TAMARILLO

BOLD GOLD Fast growing tree that will get to 3 metres if ideal frost-free, sheltered micro climate is achieved. Large golden fruit with sweet and less acidic flavour than the red variety. **\$12.00**

RED Tamarillo's are subtropical, they need a frost-free, sheltered microclimate. Best eaten raw but great stewed, bottled and frozen or made into chutney and jam. Oval red skinned fruit produced, with red flesh. **\$12.00**

CITRUS

All citrus \$30.00

LEMON - MEYER A very popular lemon for the home garden. More cold tolerant than other varieties, frost tolerant. The lemons are medium in size, thin skinned, sweetly fragrant flowers.

LIME - BEARSS A heavier bearing selection of Tahitian Lime well suited to cooler climates. Good size fruit which are seedless, juicy and ideal for drinks or cooking. Ideal specimen for pots, requiring good drainage a warm position and frost protection. Available on Trifoliata 2 x 1.5 metres and on dwarf Flying Dragon rootstock 1.5 x 1.2 metres.

KAFFIR A popular culinary citrus whose aromatic leaves are used extensively in Asian cooking. An evergreen shrub with green, rough and 'warty' inedible fruit but great in cooking when you zest the skin of the fruit. Protect from hard frosts. 1.5 x 1.2 metres

MANDARIN

AFOURER - Easy to peel fruit, needless if not crossed pollinated, juicy flesh with a rich and sweet flavour. Fruits from late winter and prefers a sunny sheltered spot. 2.0 x 1.8 metres

ENCORE A summer bearing mandarin with exceptional flavour. Good size, thin skinned fruit which are very sweet and juicy, easy to peel. Fruit holds well on the tree. Seedless unless cross pollinated with other citrus. 2.0-1.5 metres.

KWANO A heavy cropping easy peel Satsuma mandarin selection. Sweet, juicy fruit ripening in winter. Seedless if not cross pollinated. Excellent container plant and quite cold tolerant when established. 2.5 x 2 metres.

MIYIGAWA WASE An older selection of Satsuma mandarin with high quality largish fruit which is early and seedless. Flesh is juicy with a sweet tangy flavour. 2.5 x 2 metres.

TANGELO - SEMINOLE This Mandarin-grapefruit cross produces great crops of juicy, semi-flat, reddish orange fruit. Suberb flavour - a sweet mandarin taste, followed by the grapefruit tang. Protect from hard frosts. On dwarf Flying Dragon rootstock 1.8 x 1.5 metres

FEIJOAS

All Feijoas \$18.00 each or 3 for \$48.00

APOLLO - Large, long sweet-tasting fruit with excellent flavour. Skin is light green in colour. Moderately upright growing habit, vigorous, forms a good branching framework. A self-fertile variety with fruit ripening in April, but does best with cross-pollination.

MAMMOTH - A very large fruited old fashioned variety, with smooth green skin, sweet aromatic flavour, slightly gritty, soft juicy pulp. It bears prolifically in May and June and is self fertile.

TRIUMPH - A late season variety which sores well. Medium sized fruit with a firm skin and good flavour, juicy and moderately soft flesh. Best with other feijoas to pollinate.

UNIQUE - Large, sweet, juicy fruit produced on small tree, which bears prolifically. An excellent home garden choice as smaller and self-fertile. Fruit matures in April/May.

FIGS

All Figs \$18.00

ADRIATIC Late, large round green skinned figs with dark red very sweet pulp. Huge reliable crops of good for dessert, jam, wine and bottling. Ripens in April.

BLACK MISSION A medium to large, pear shaped, purplish black fig, strawberry coloured flesh with excellent flavour. Figs ripen summer through to autumn.

BROWN TURKEY A heavy producer of large conical shaped figs that are light amber/pink in colour. Ripening March-April and has a full rich flavour, suitable to eat fresh as a dessert fig, preserve or jam. Arguably the worlds most popular fig.

VENTURA A compact growing variety suitable for containers. Fruit are large flat green, deep ruby-red flesh with a strawberry jam like flavour. Ripens March through till early April.

GRAPES

All Grapes \$20.00

ALBANY SURPRISE

Good crops of large mild Lubrusca flavoured juicy black Berries. A hardy variety that ripens mid to late season.

BISHOP POMPALIER

A grape from Bishop Pompallier's own plantings in Northland. A disease-resistant large, black, sweet, delicately-flavoured grape. Ripens Early March.

BLACK DALMATIAN Originally from an old Dalmatian orchard in Kohukohu, where they show natural disease resistance. Large black dessert grapes, strong musky flavour and lots of tannin, ripens in late March.

CANADICE

Moderate to heavy crops of medium red fleshy thin-skinned berries in medium shouldered bunches. A mid season variety, disease resistant. Virtually seedless.

NEW YORK MUSCAT Good crops of medium red/black grapes held in loose bunches. They have a pleasant Muscat flavour with a 'Jelly' texture. A Muscat flavour is one with pronounced pungent, sweet floral aromas.

NIAGARA

A very early white dessert grape, ripening March, which is very sweet with a good mild flavour. One of the few dessert grapes that can be grown organically.

SCHUYLER A regular cropping outdoor, table grape, bears from first season. Medium to large berries, jet-black with heavy bloom. Flavour neutral, pleasant. Early Ripening.

URBANA Good crops of large cherry red berries. Fruit is thick skinned with a jelly texture and exquisite sweet Lubrusca flavour. Disease resistant.

WHITE DALMATIAN Originally from the Hokianga from an old Dalmatian Orchard. The grape has a rich depth, very sweet flavour. Ripens after Niagra in April.

We also have ornamentals (just because we love them) which include magnolias, rosemary, lavender and many herbs plus a range of perennials and hostas.

Olive El Greico @ \$10.00 each super special.

Setha's Seeds we are excited to offer the full range of Setha's NZ Heritage seeds through the shop (or we can post to you) for the full range check out our beautiful catalogue in store or the online catalogue at www.sethaseeds.co.nz Seed packets @ \$3.50 each

EDIBLE GARDEN – Orchard extra's

COMFREY PLANTS – Comfrey is a fantastic plant for the orchard as living mulch. It has a very long tap root that mines vital minerals from the soil and recycles them to the top for your fruit trees. In winter it dies down and leaves its nutrient rich leaves on the soil surface. Plant at the drip line **\$ 8.00**

GERANIUM - PEPPERMINT A spreading geranium with downy leaves. A strong peppermint scent which is ideal for deterring codlin moth larvae from beneath apple trees. Single white flower. **\$10.00**

MEXICAN MARIGOLD

A bushy evergreen shrub. A strong fragrance from the finely divided foliage is released when rubbed or brushed against. Orange-yellow flowers in autumn-winter-spring with off bloom in other seasons. Plant in sun or part shade in a well-drained soil. **\$8.00**

A list of Fruit trees now in containers please refer to main catalogue for descriptions @ \$35.00
